

A. Species agreement (both versions committed)

n = 10,427 recordings; 88% on the diagonal. NoID excluded.

B. What each version does on the same recordings

Of 70,110 matched recordings, v30.1 commits to a species on 34,672 that v4.4.5 leaves NoID (reverse: only 360)

C. Confident detections per species (shared nights)

Log scale; label = v30.1 / v4.4.5 ratio. New species sit at the v4.4.5=0 floor.
